L-A DEGs (seurat-pc30): F_NTC.MDD

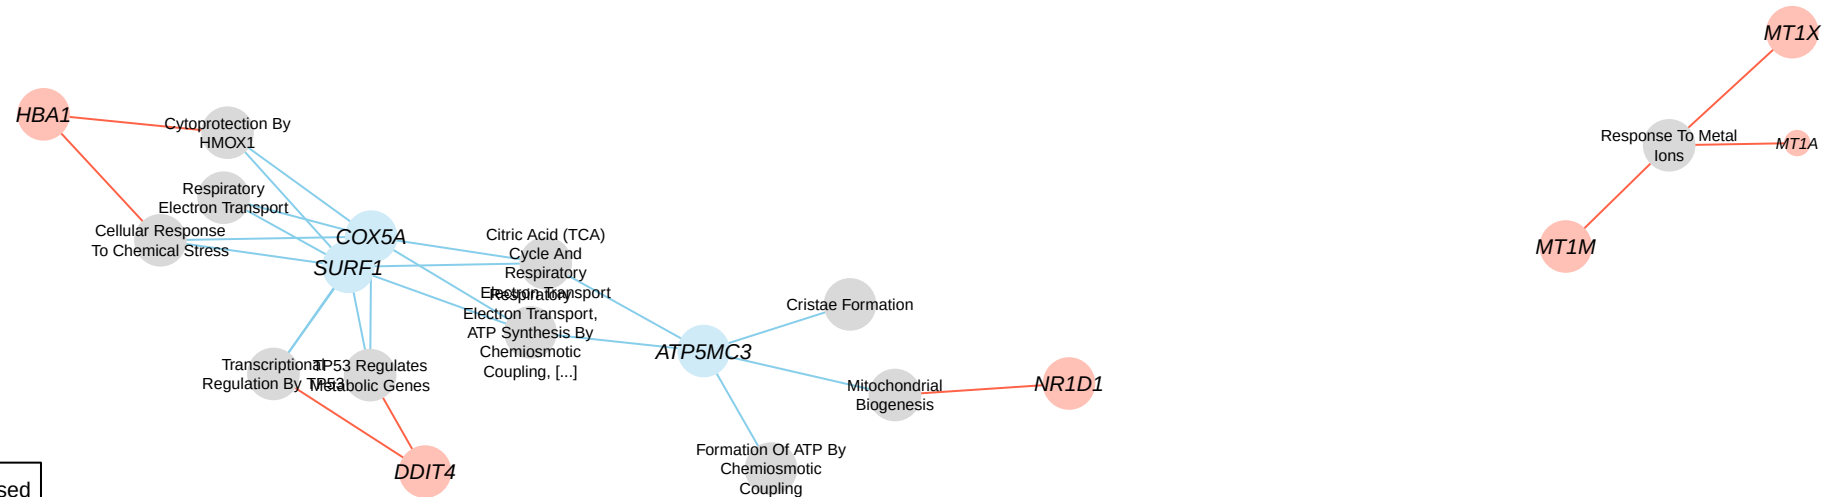

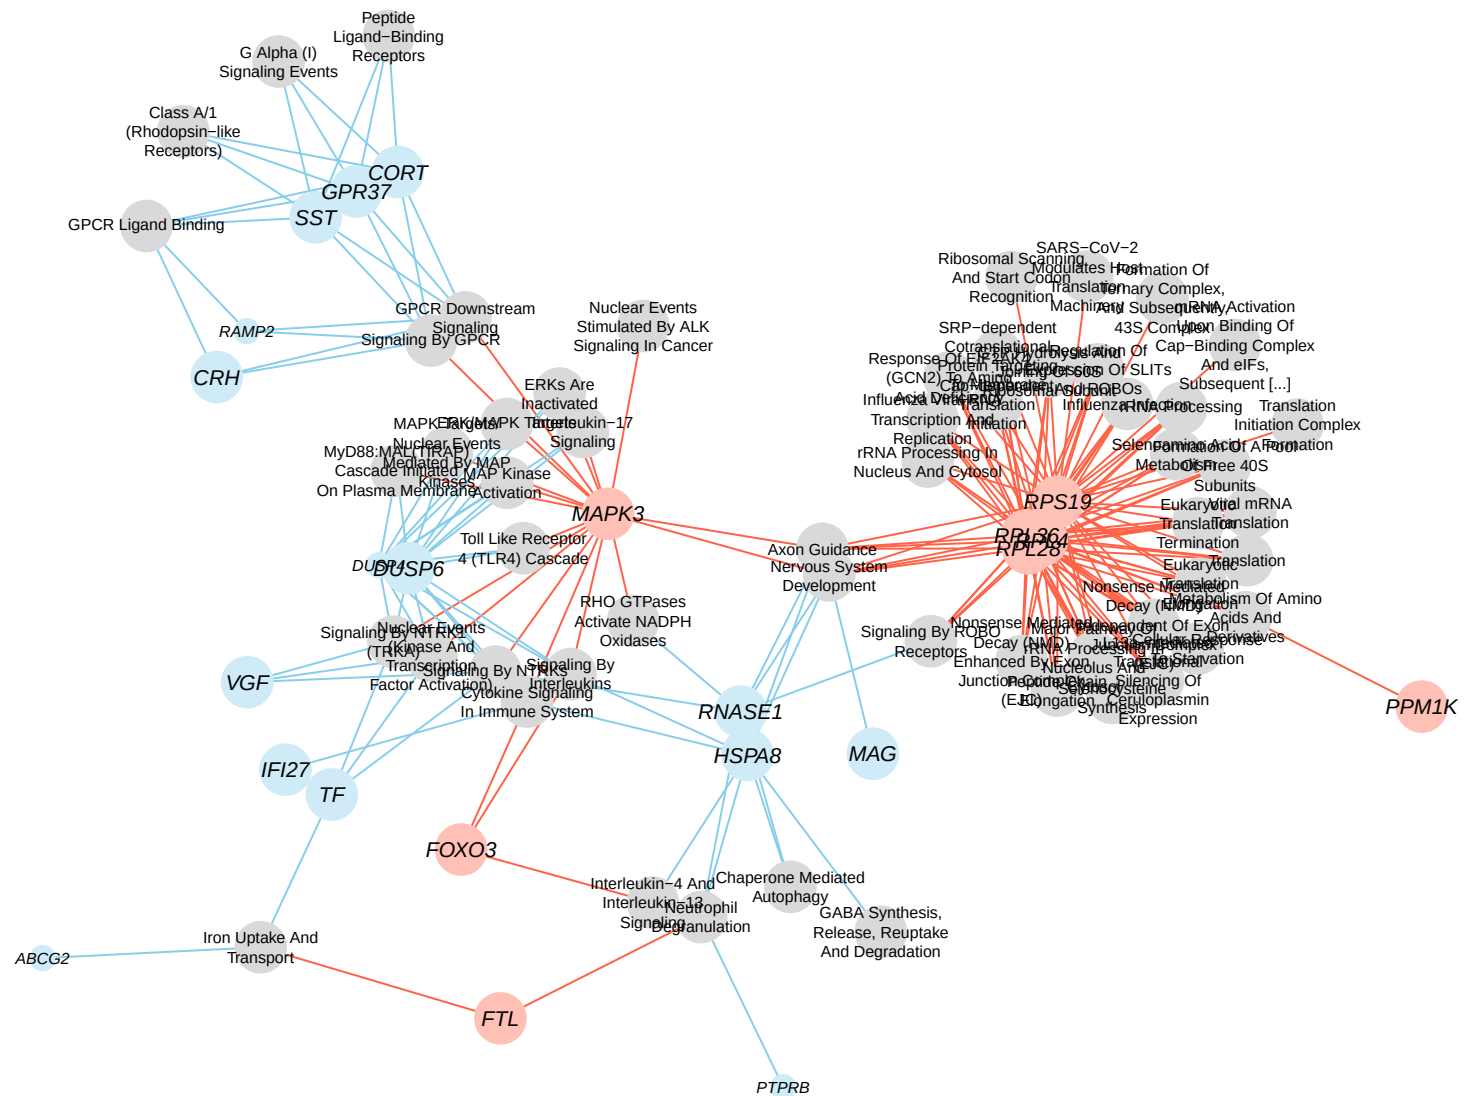

Reactome annotations determined by ORA with n= 523 genes with F-test adj. p<.05
Smaller genes have median zero proportion >=5% of spots.

L-A DEGs (seurat-pc30): M_NTC.MDD

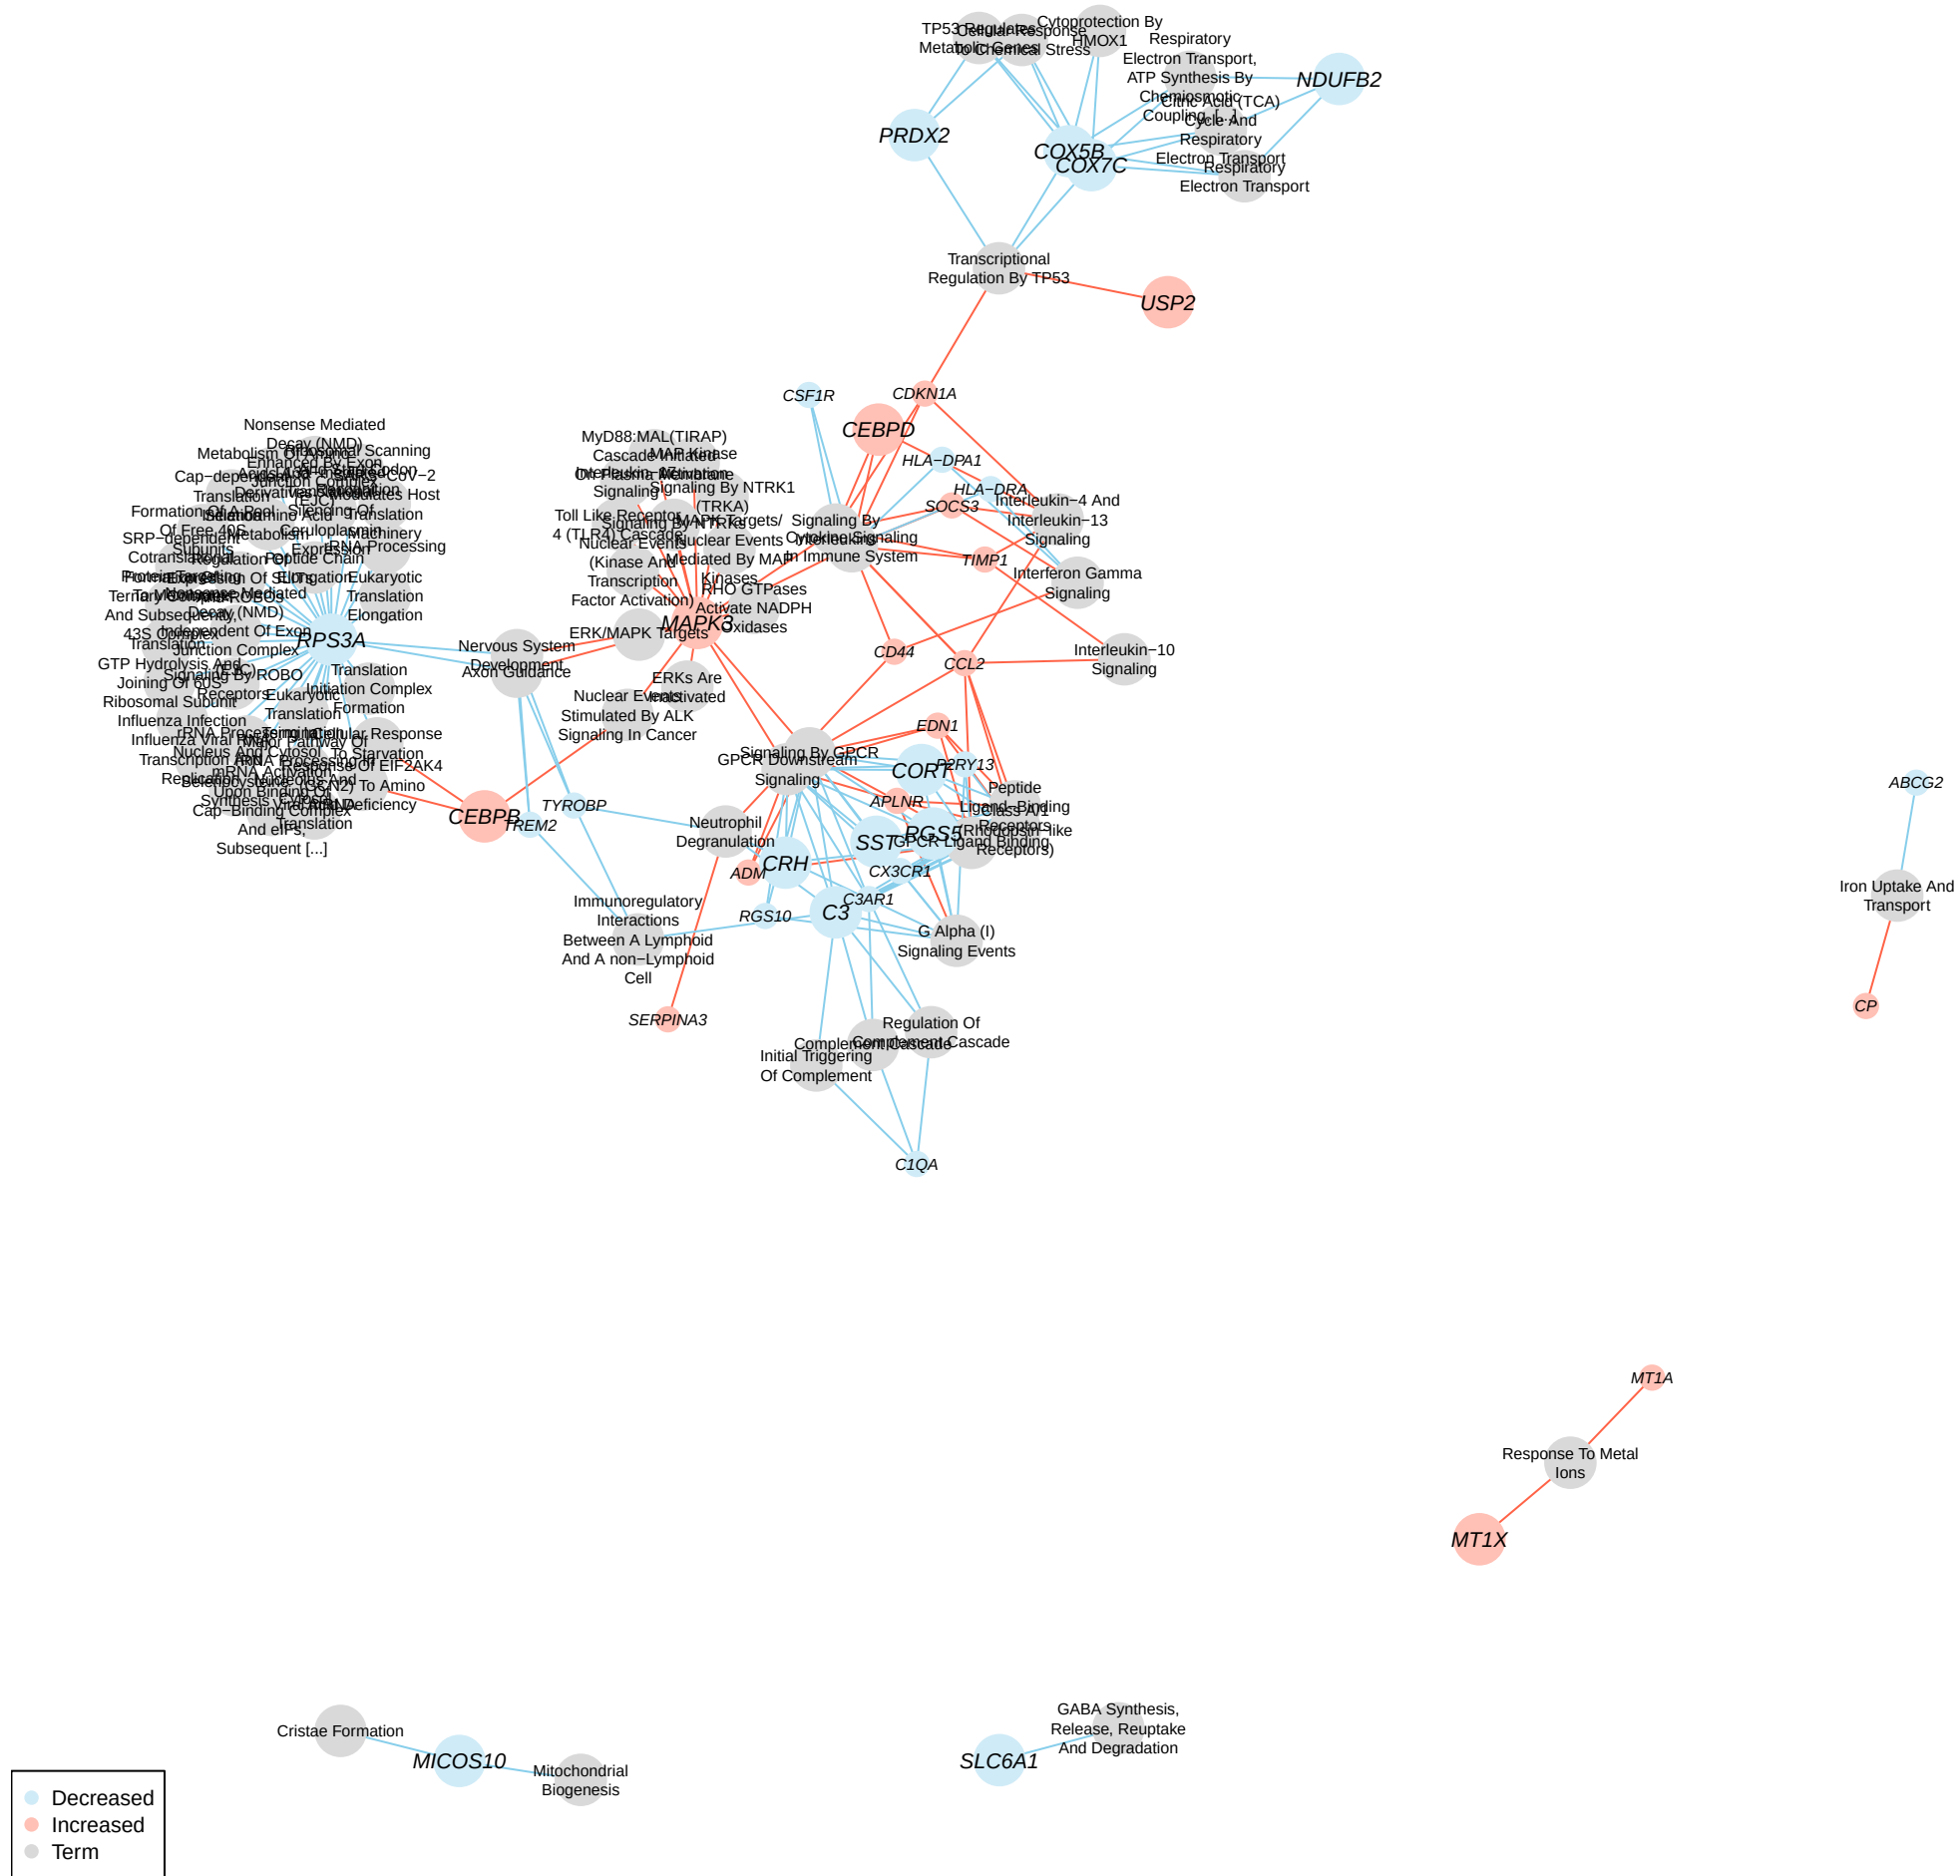

Reactome annotations determined by ORA with $n = 523$ genes with F-test adj. $p < .05$
Smaller genes have median zero proportion $\geq 5\%$ of spots.

L-A DEGs (seurat-pc30): F_NTC.BPD

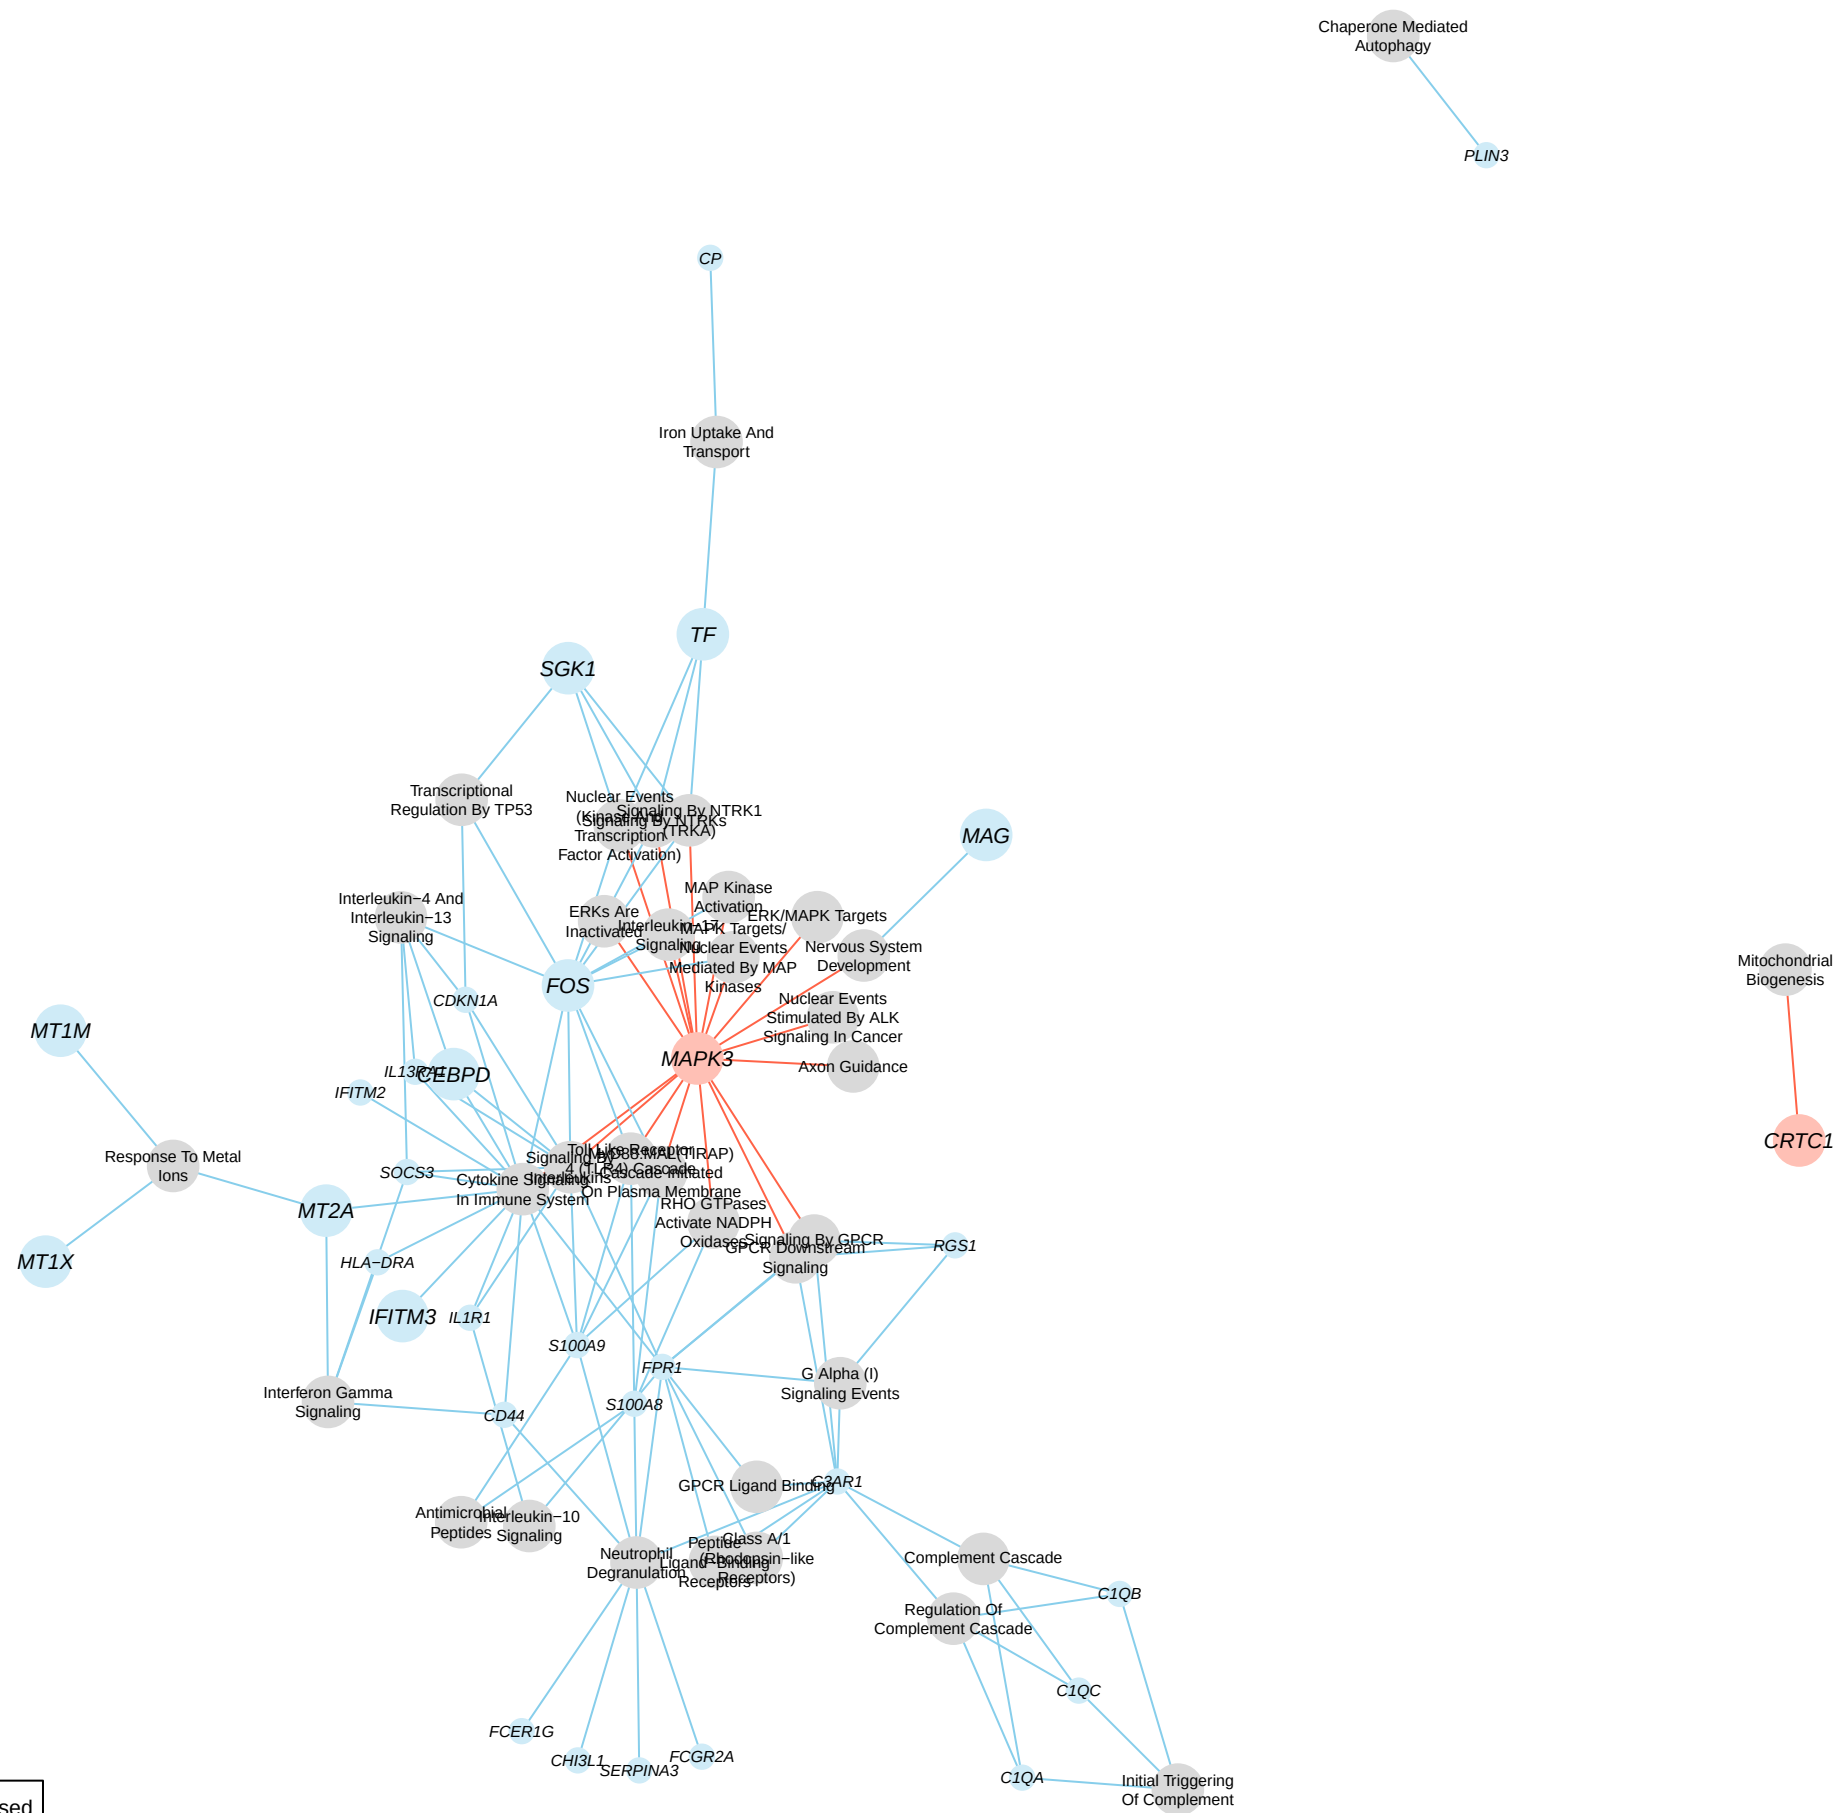

Reactome annotations determined by ORA with n= 523 genes with F-test adj. p<.05
Smaller genes have median zero proportion >=5% of spots.

L-A DEGs (seurat-pc30): M_NTC.BPD

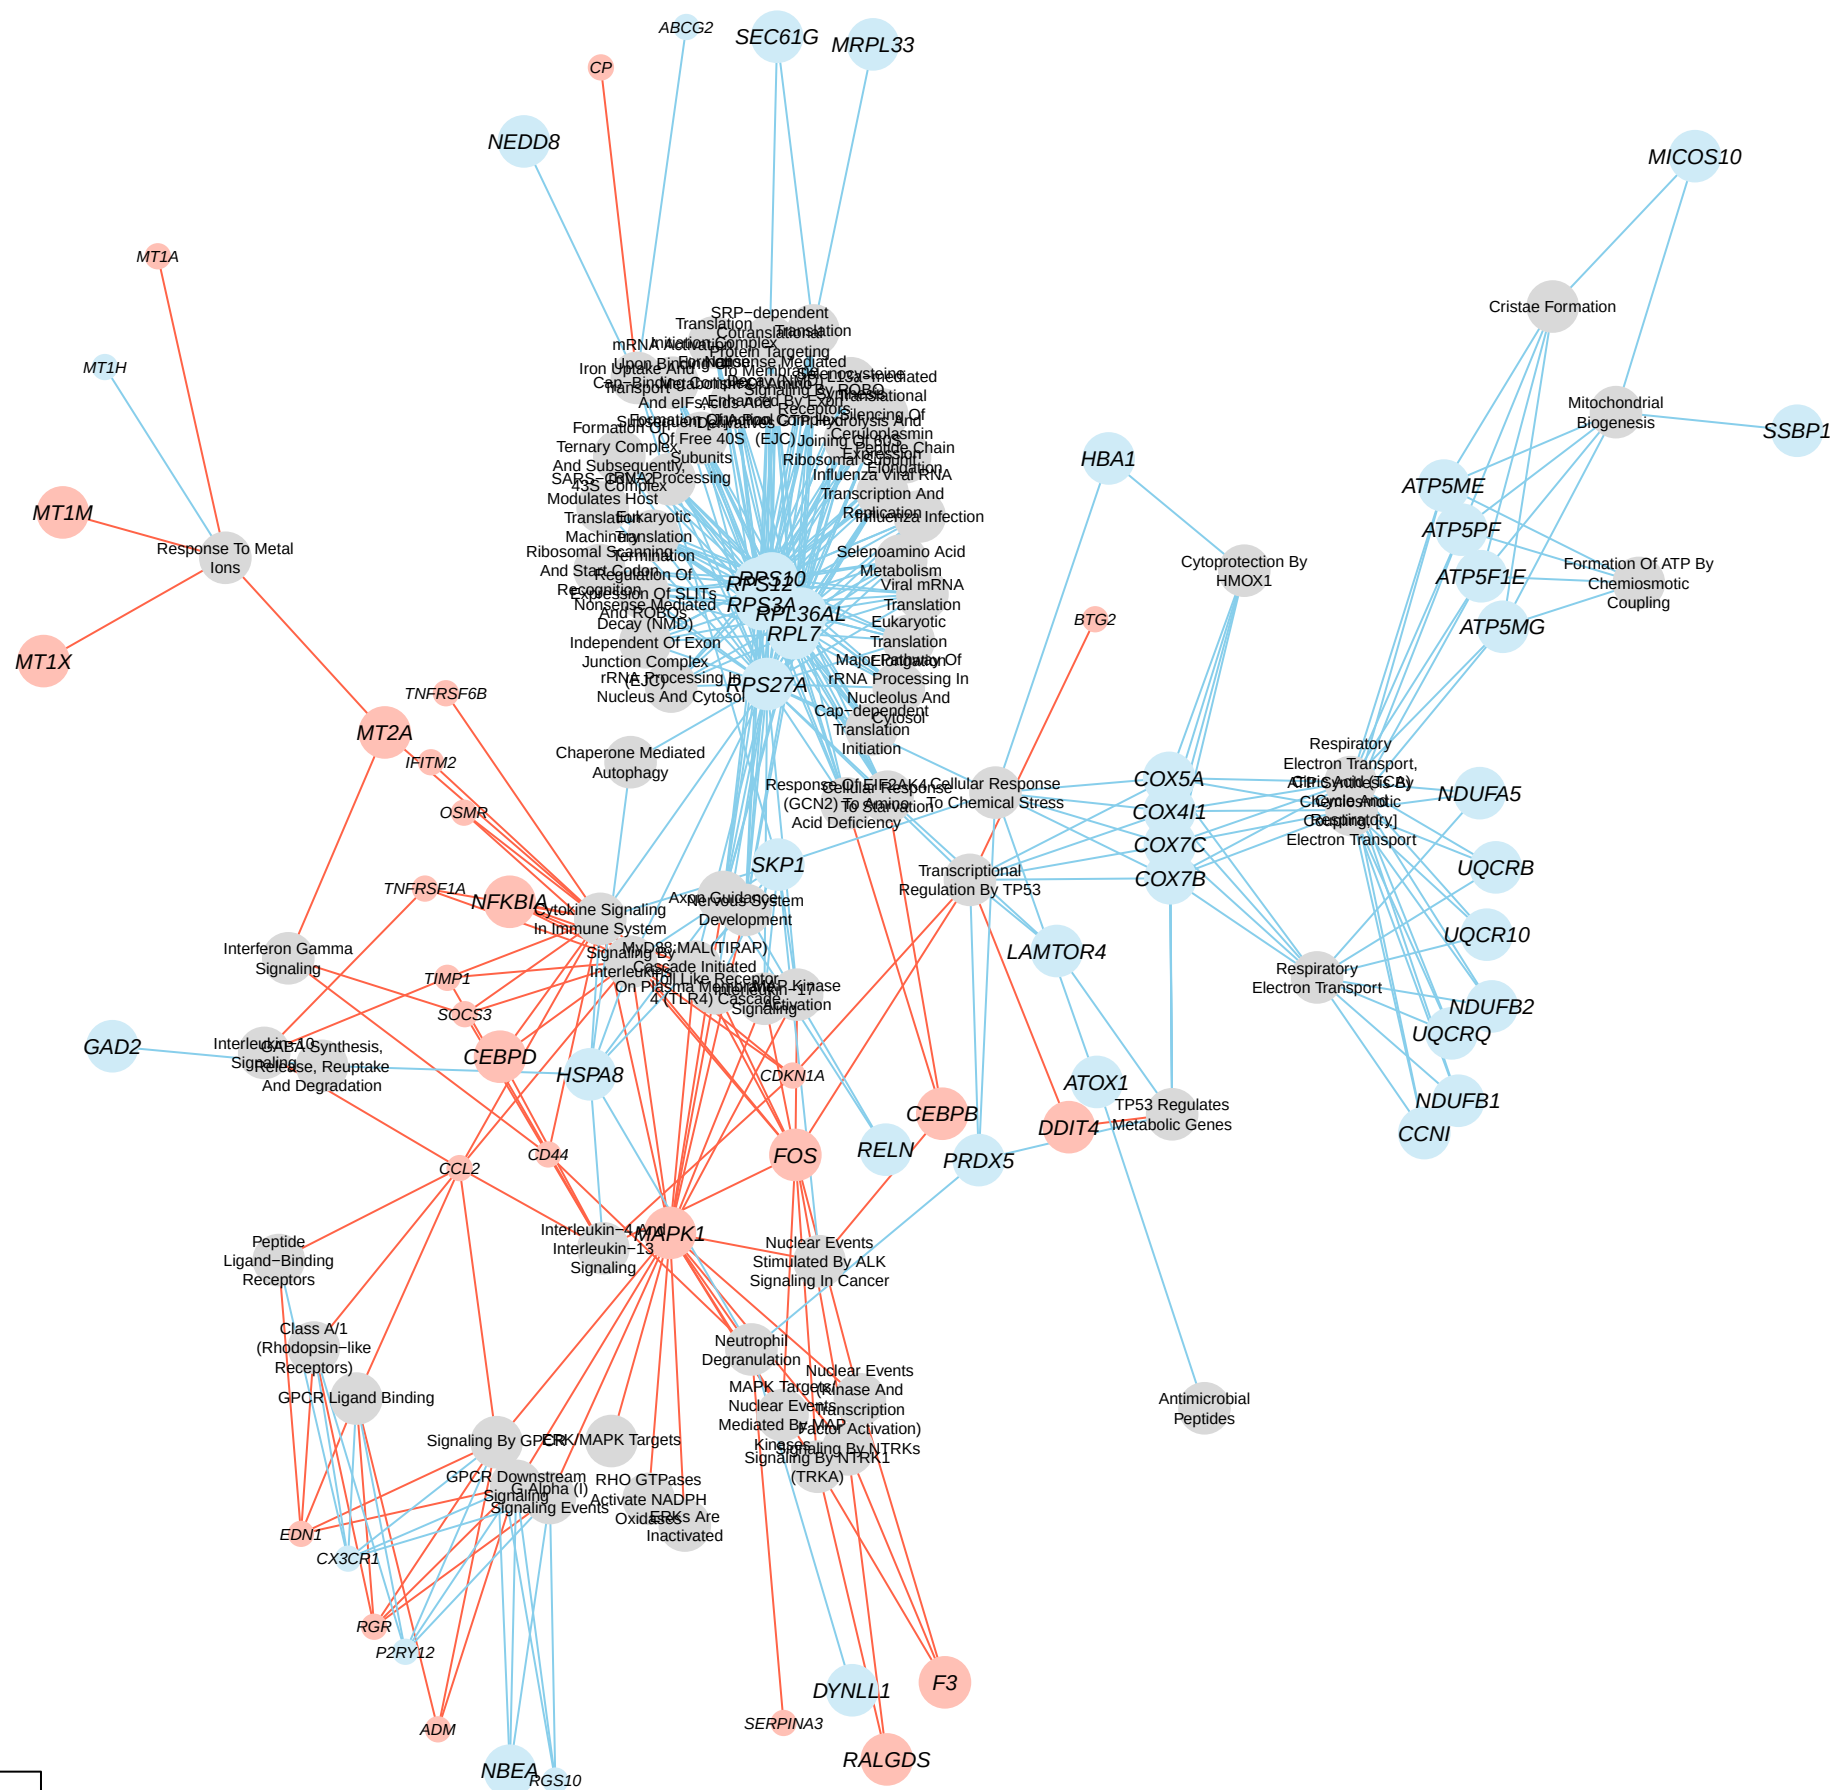

Reactome annotations determined by ORA with n= 523 genes with F-test adj. p<.05
Smaller genes have median zero proportion >=5% of spots.

L-A DEGs (seurat-pc30): F_MDD.BPD

Reactome annotations determined by ORA with n= 523 genes with F-test adj. p<.05
Smaller genes have median zero proportion >=5% of spots.

L-A DEGs (seurat-pc30): M_MDD.BPD

Reactome annotations determined by ORA with n= 523 genes with F-test adj. p<.05
Smaller genes have median zero proportion >=5% of spots.
