Top logFC DEGs per theme annotated with black

The image displays a 2D point cloud visualization on a light blue background with horizontal grid lines. There are 8 vertical columns of points. The points are colored in a gradient from white to black and vary in size. The distribution of points is as follows:

- Column 1 (Leftmost):** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large white and light gray points near the top and middle.
- Column 2:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 3:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 4:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 5:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 6:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 7:** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large dark gray points near the top and middle.
- Column 8 (Rightmost):** Contains points of various sizes and colors, including white, light gray, and dark gray. There are several large white and light gray points near the top and middle.
