

L-A model: seurat-pc30

Of 523 genes with F test adj. $p < .05$, 331 genes also with t-test adj. $p < .05$.

L-A DEGs
(F adj. $p < .05$)

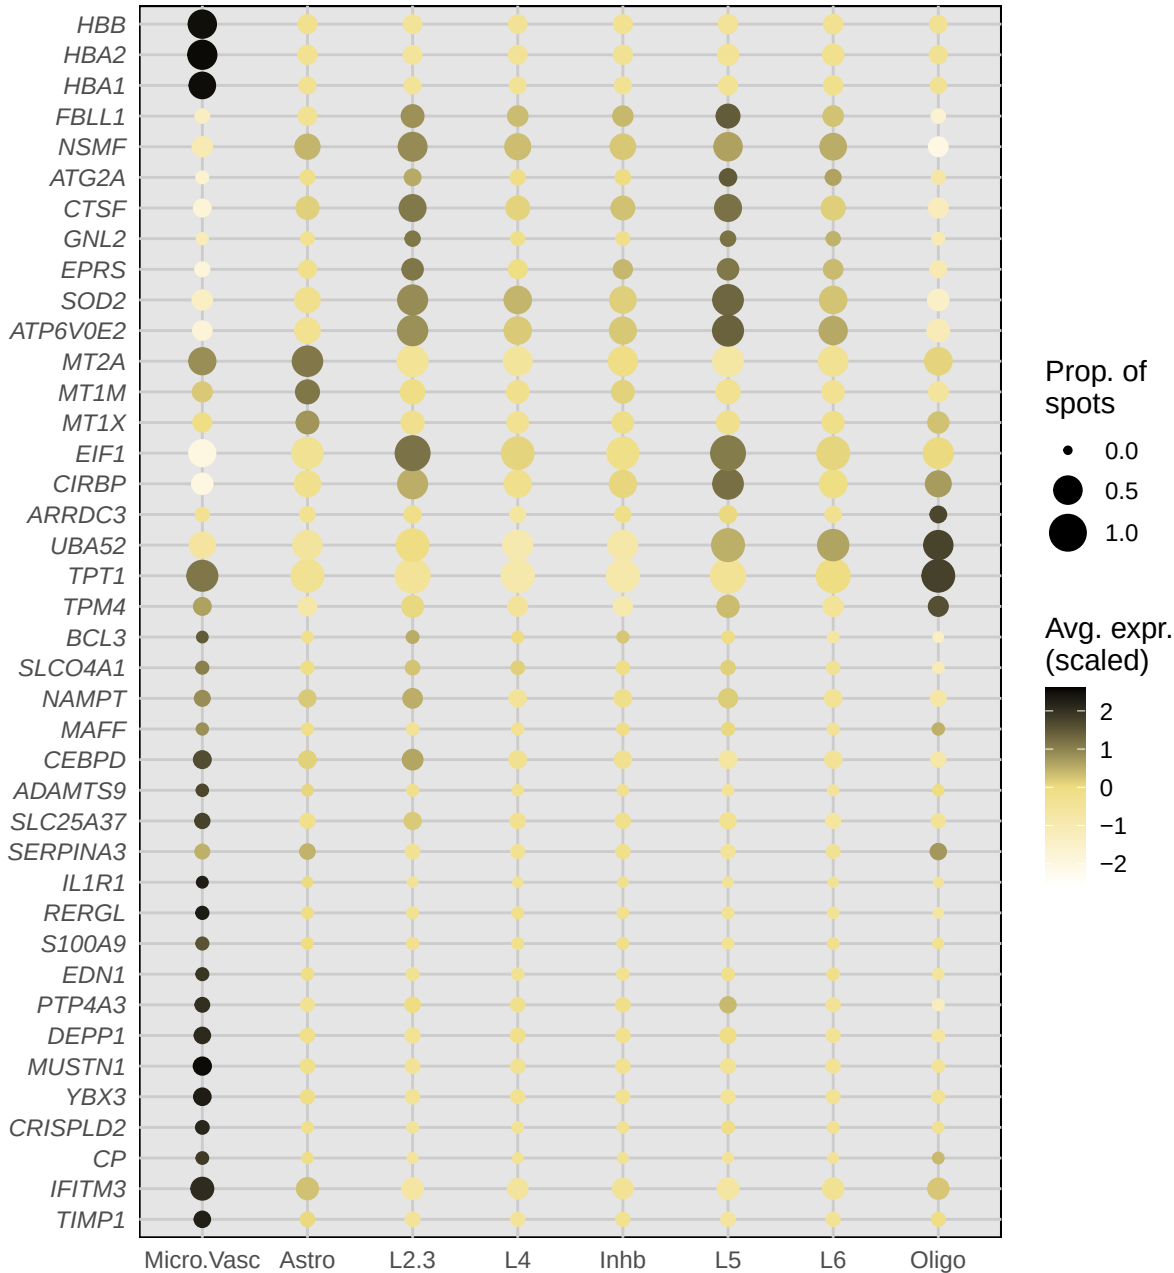

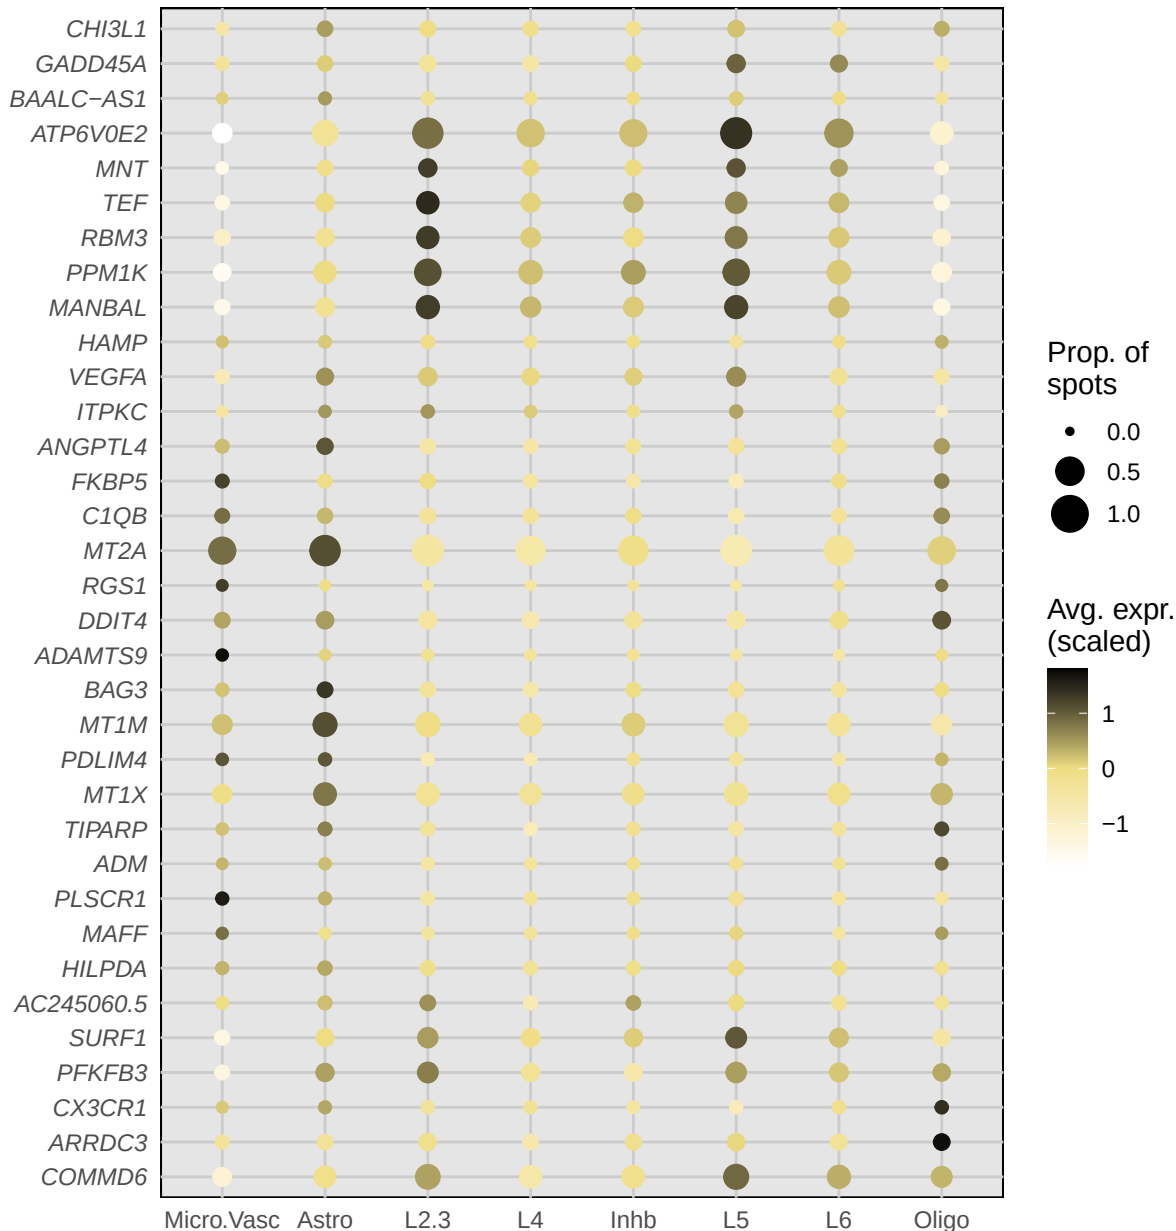

L-R model: seurat-pc30

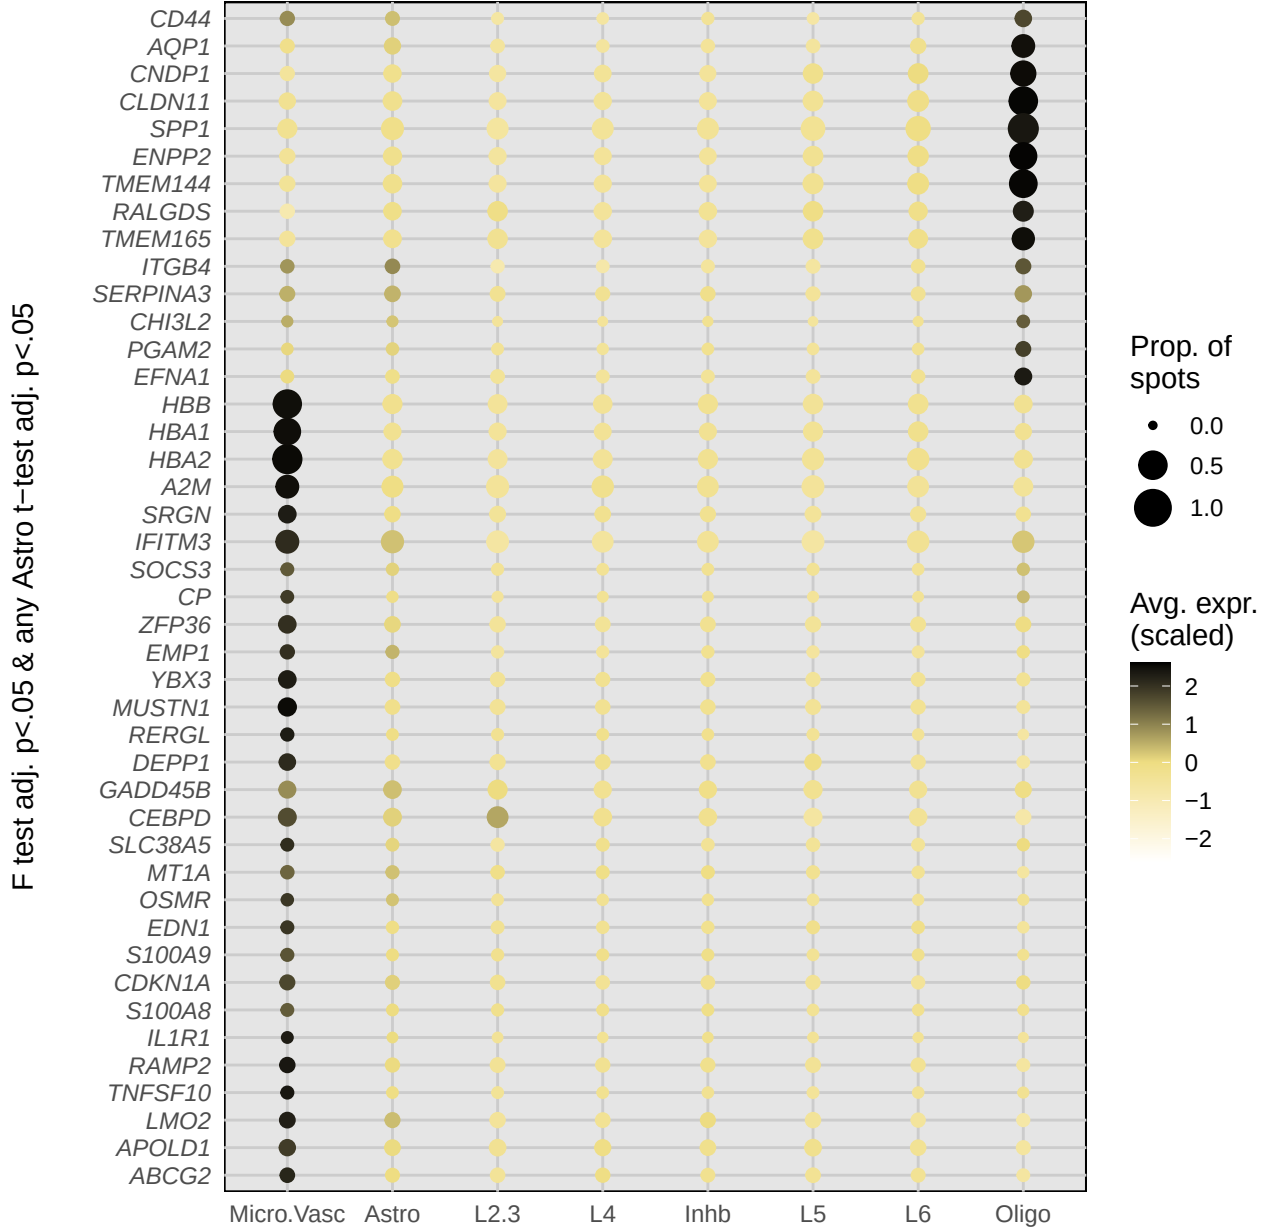

Of 267 genes with F test adj. $p < .05$, 203 genes also with t-test adj. $p < .05$.

L-R seurat-pc30: Micro.Vasc DEGs

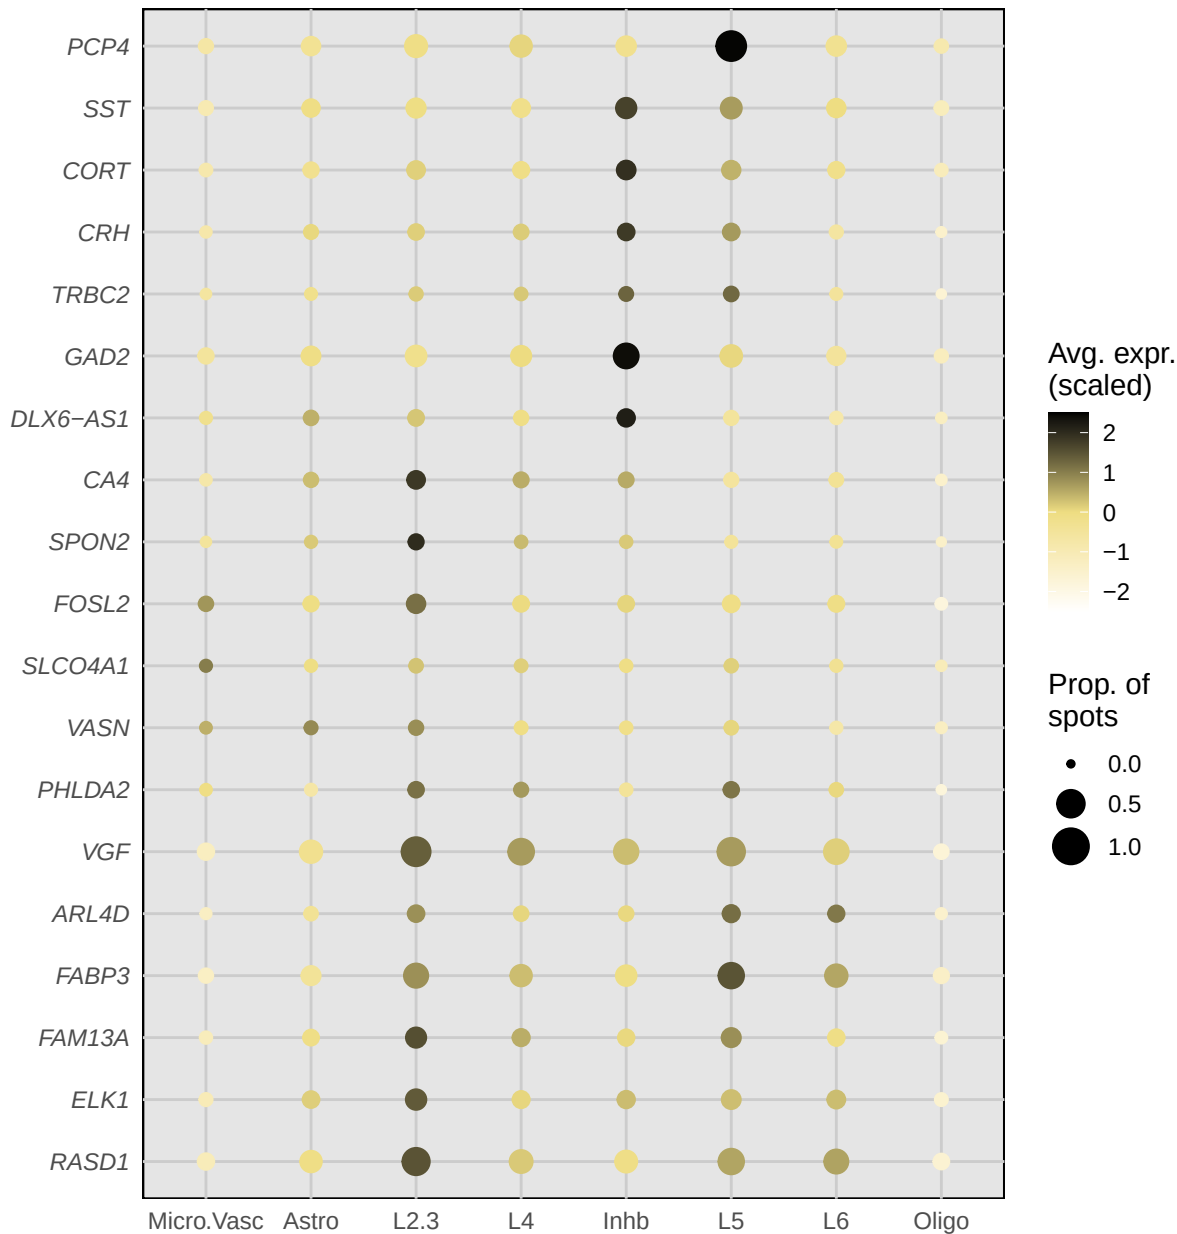

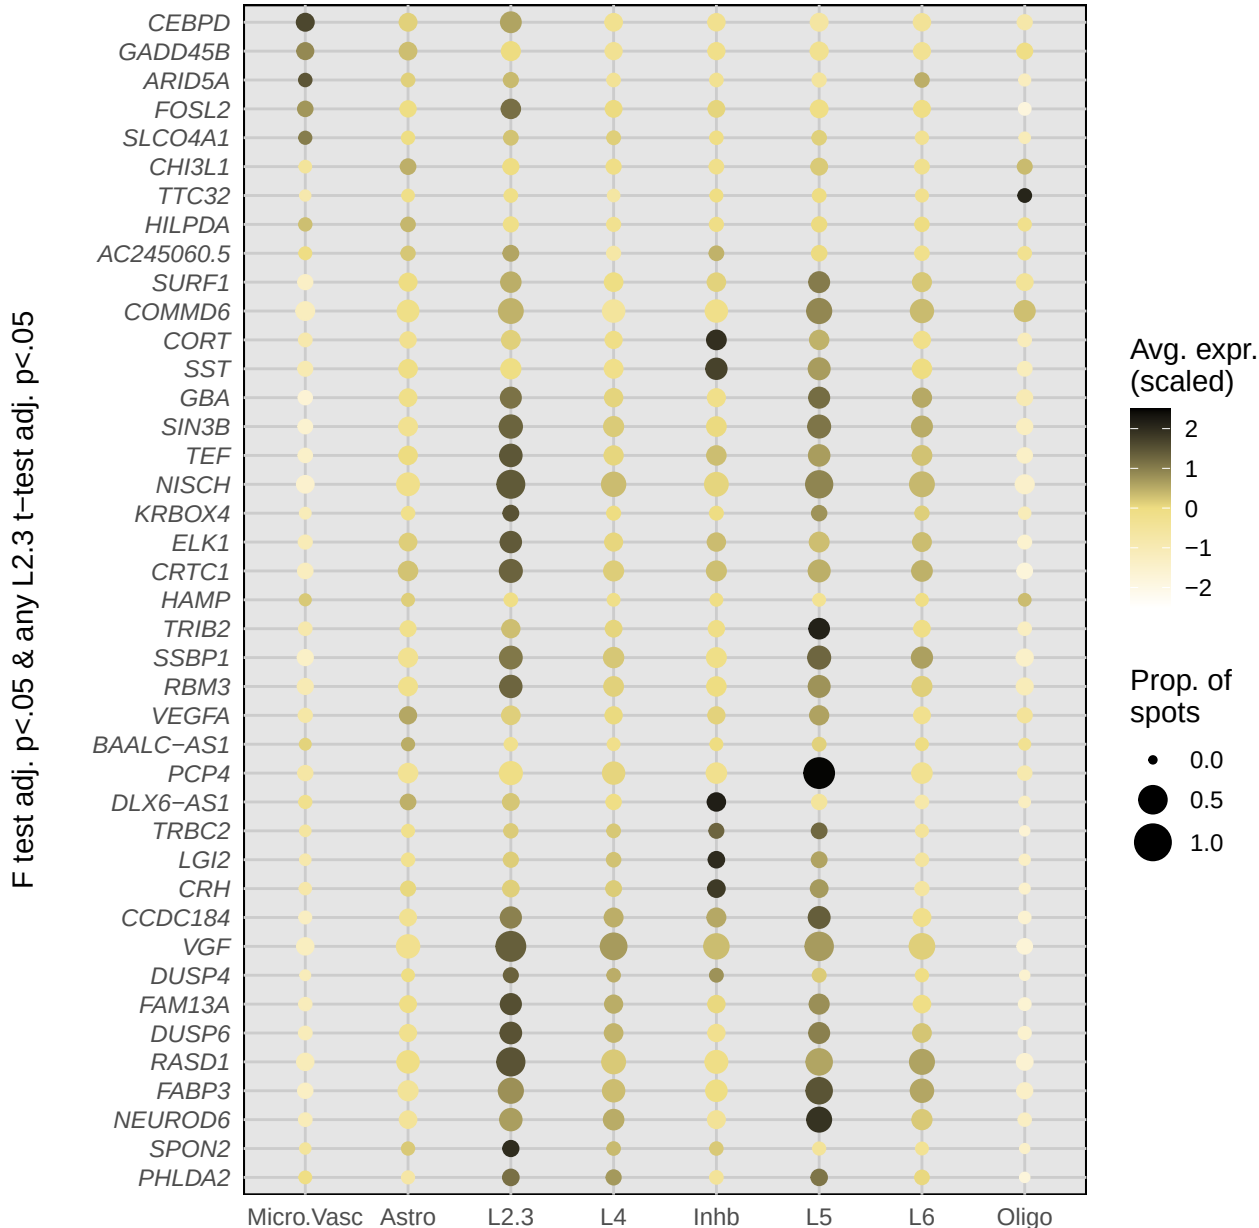

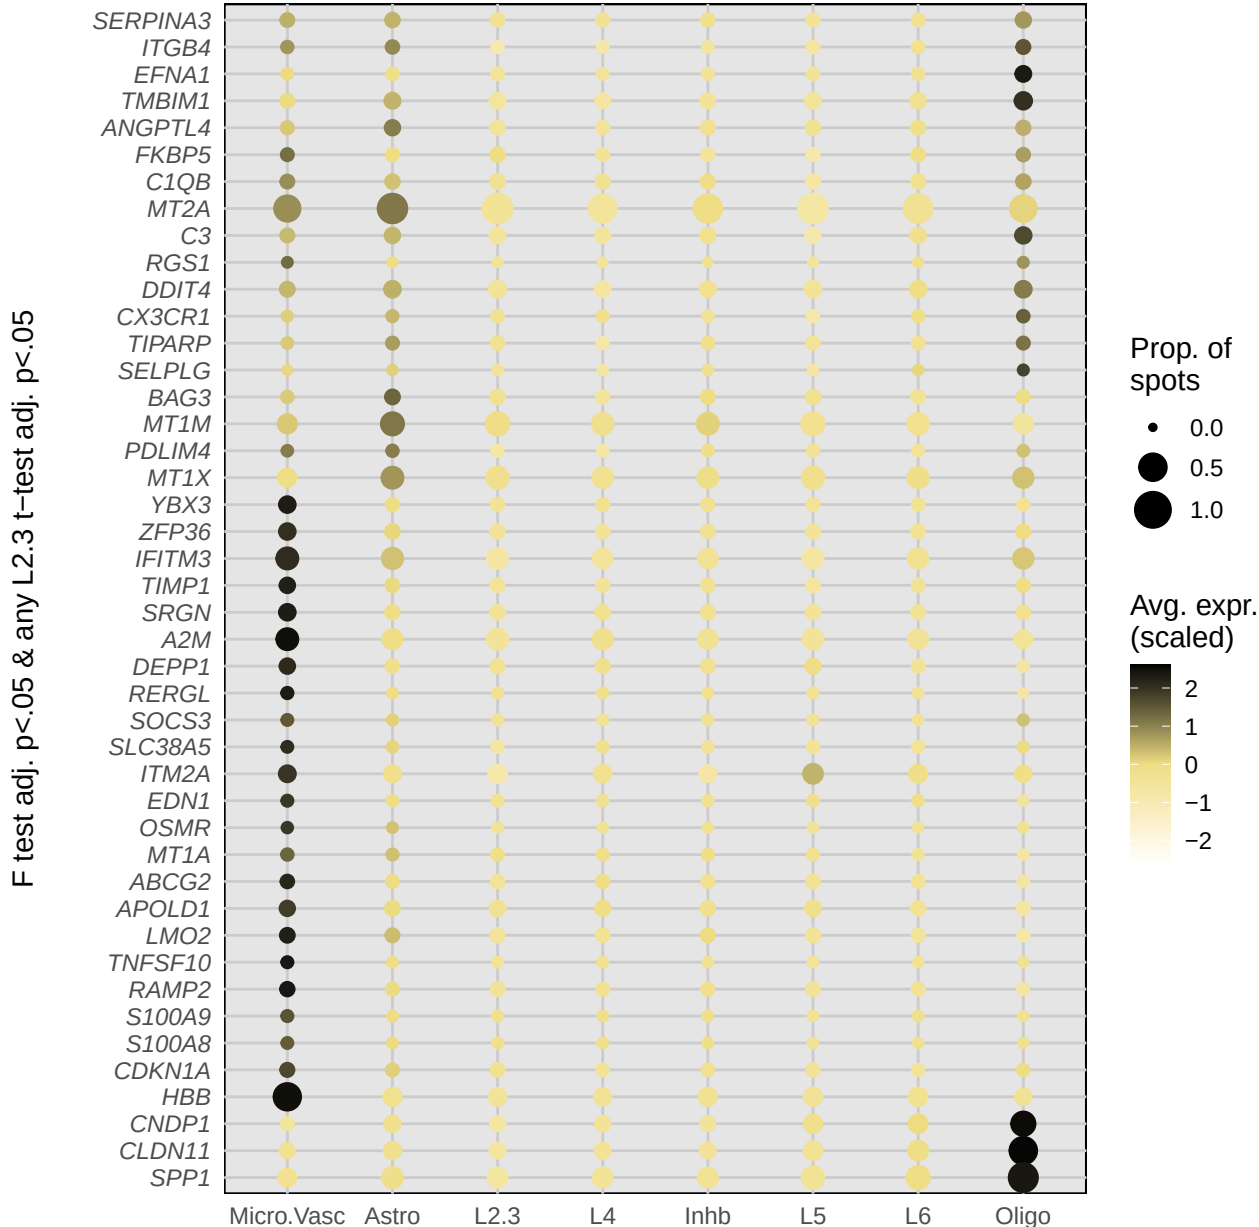

L-R seurat-pc30: Astro DEGs

F test adj. p<.05 & any Astro t-test adj. p<.05

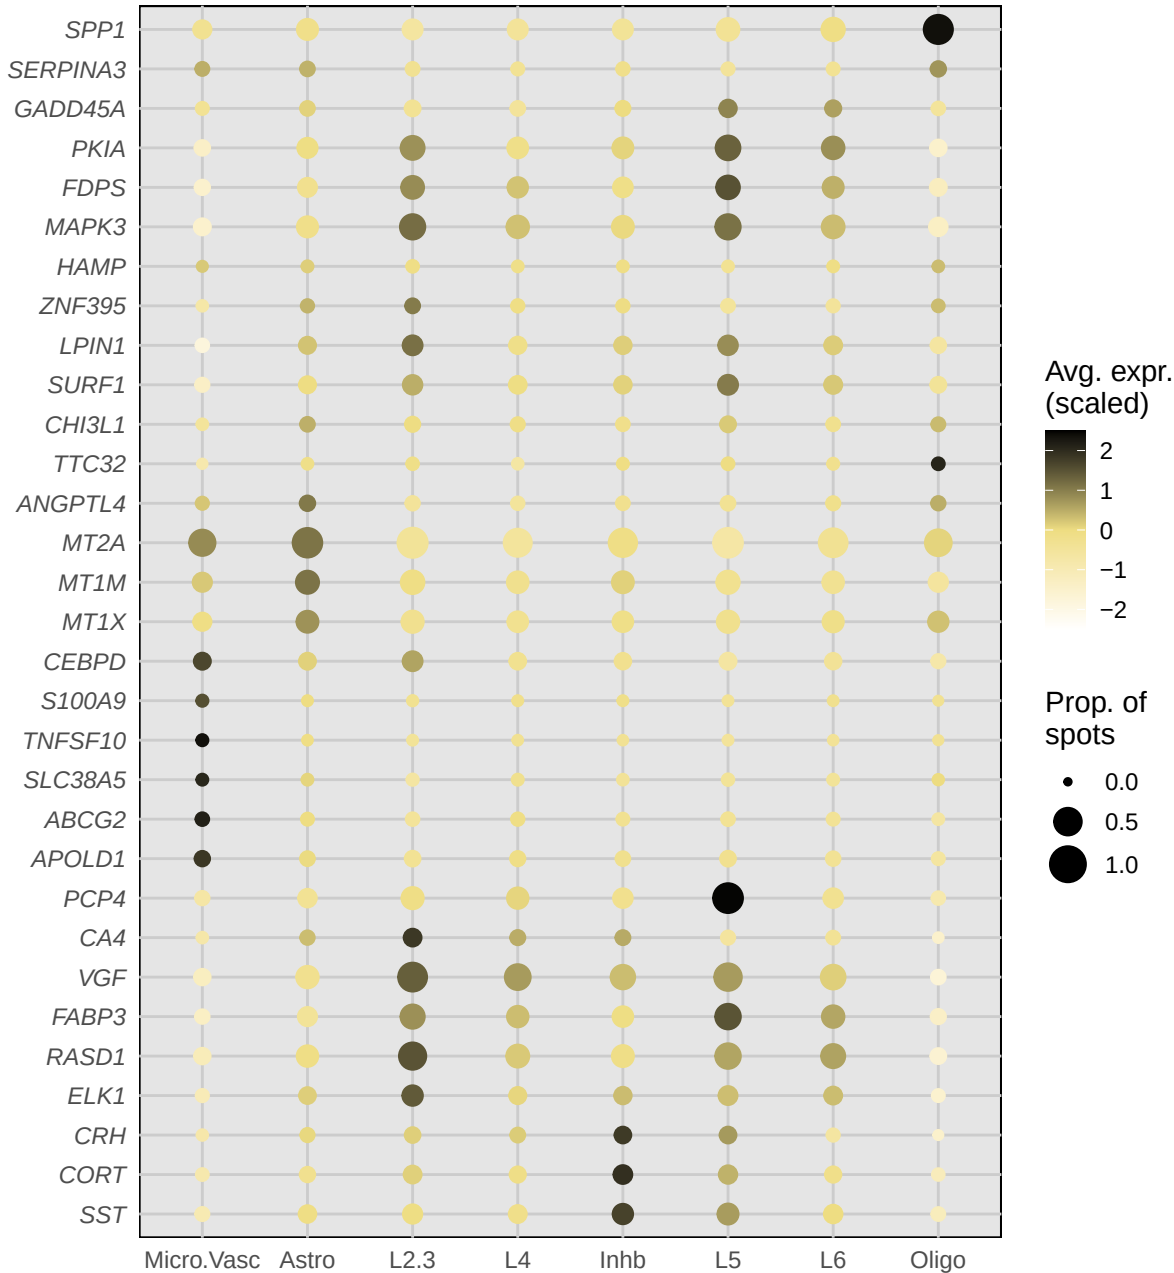

L-R seurat-pc30: L2.3 DEGs

L-R seurat-pc30: L4 DEGs

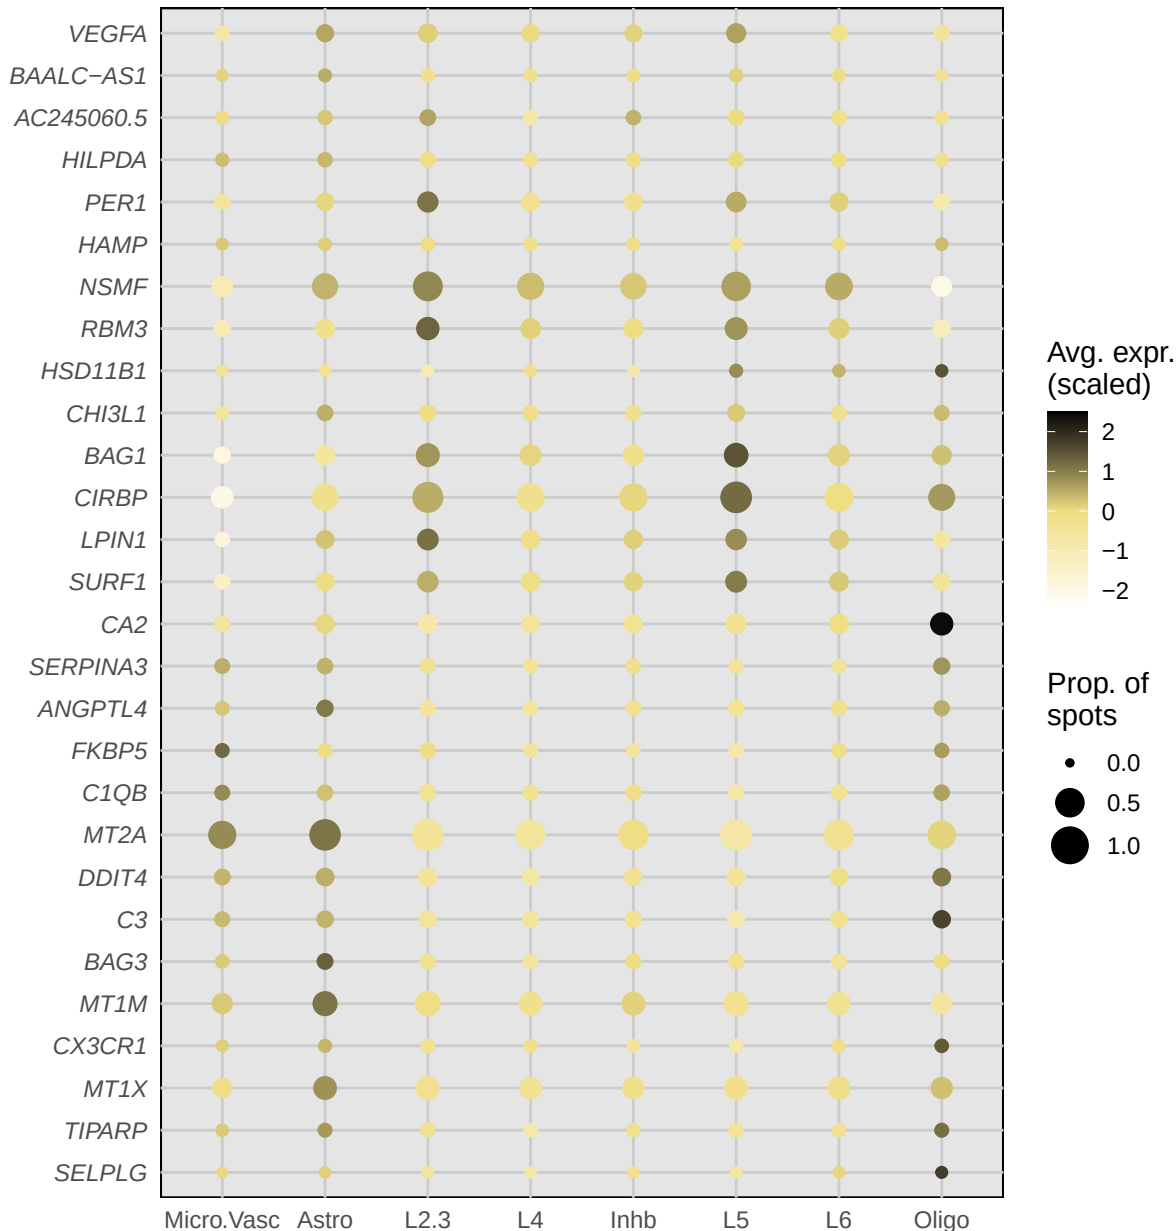

The visualization consists of 10 vertical lines, each representing a category or bin. Each line contains a series of circles of varying sizes and colors. The colors range from black at the bottom to yellow at the top, with intermediate shades of gray and olive green. The size of each circle represents the frequency or density of data points in that specific bin and color range. The circles are arranged in a way that suggests a distribution across the vertical axis, with some bins showing higher concentrations of data points than others. The overall pattern shows a general increase in frequency as the color transitions from black to yellow, with some variations in the distribution across the different vertical lines.
